- **Location:** Niterói, RJ, Brazil (Open to relocation)

PROFESSIONAL SUMMARY

Fullstack Software Developer with over 20 years of experience in desktop and web application development. Extensive expertise in back-end (C#, .NET, NestJS) and front-end (Angular, React, TypeScript) technologies, as well as relational databases (SQL Server, Oracle, MySQL, PostgreSQL). Specialized in solutions architecture and cloud computing (AWS, Azure, Firebase) with a proven track record in the financial, e-commerce, and retail sectors. Proactive, self-taught professional experienced in Agile environments (Scrum, XP) and DevOps practices (Docker, CI/CD). Proficient in utilizing AI to enhance the development process.

SKILLS

- **Languages & Frameworks:** .NET (Core, Framework, MVC, WebForms), C#, NestJS, Node.js, Angular, React, JavaScript/TypeScript, PHP, Python, VB.NET, Delphi.
- **Databases:** SQL Server (T-SQL, SSIS), Oracle (PL/SQL), MySQL, PostgreSQL, MongoDB.
- **Cloud & DevOps:** AWS, Microsoft Azure, Google Firebase, Docker, Kubernetes, CI/CD Pipelines, Jenkins, Git.
- **Other:** WCF, Web Services, Microservices, Xamarin, Ionic, WordPress.

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer | Nstech September 2025 – July 2026 | Remote (Ponta Grossa, PR)

- Development and maintenance of logistics products, focusing on yard management for receiving and shipping.
- **Tech Stack:** .NET (4.8, Core, Standard, MVC), C#, Python, SQL Server, and MongoDB.

Solutions Architect & Full Stack Developer | Reditus, SA June 2020 – May 2025 | Remote (Lisbon, Portugal)

- Architected and developed enterprise systems for large-scale clients in the financial and government sectors, including data modeling and service integration.

- Defined cloud solutions (Azure, AWS) and implemented DevOps CI/CD pipelines.
- Collaborated with international clients across Portugal, Mozambique, and Switzerland.

Full Stack Software Developer | Fadami - Software & Innovation January 2025 – April 2025 | Hybrid (Rio de Janeiro, Brazil)

- Full stack development of a "Free Flow" toll payment product.
- **Tech Stack:** ReactJS, .NET, and SQL Server (T-SQL).

Full Stack Developer | Banco de Portugal September 2019 – April 2020 | On-site (Lisbon, Portugal)

- Developed the SIRES project (Relevant Information System).
- Built front-end and back-end features using ASP.NET MVC, Web API, and JavaScript, consuming REST APIs and managing data with SQL Server (T-SQL/SSIS).
- Contributed to requirements analysis and implemented full stack solutions within a Scrum environment.

Full Stack Software Developer | IBMEC August 2018 – August 2019 | On-site (Rio de Janeiro, Brazil)

- Maintained Academic and Financial systems using C# (ASP.NET MVC, WebForms) and Angular.
- Developed student management modules and financial features for the SIGA system, including bank slip (boleto) generation and processing.
- Contributed to the open-source project *Boleto.Net* for banking system integration.

Co-Founder & IT Consultant | AVM Sistemas May 2010 – August 2019 | Remote (Niterói, RJ)

- Provided independent full stack development and systems architecture consultancy for various clients.
- Implemented cloud platforms (AWS, Azure, Google Cloud) and automated infrastructure with Docker and Kubernetes.
- Developed e-commerce sites with WordPress/PHP and served as a technical mentor.

CERTIFICATIONS & EDUCATION

- **Azure:** Data Fundamentals
- **AWS:** Certified Cloud Practitioner (Essentials), Technical Professional, and Business Professional
- **Development:** C# Design Patterns, Docker for .NET Developers, ASP.NET Core MVC
- **Database:** Oracle 9i DBA (SQL, Administration, Tuning)
- **Other:** SAP ABAP Training, Product Owner 8K+
